

Rotation Flights

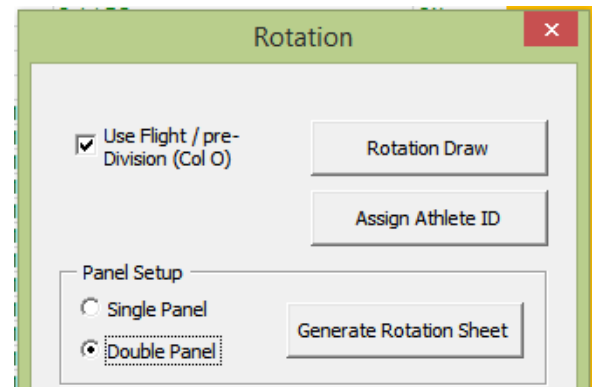

What is Flight?

In some events, there are simply too many athletes within a level to finish in one go. That is where 'flights' come in. Some criteria is applied to the pool of athletes within a level which will then divide them into flight A and B. For example, at Elite Canada 2016, there are 62 juniors. So the pool is divided into 2 pools - flight A and B. With a double panel system with flights, you finish the rotation within flight A, have a break and maybe warm-up for flight B athlete, then start flight B competition.

From a rank and score perspective, flight A and B are competing in the same level - flight affects ONLY the rotation order.

Please follow the following steps:

- Fill in the flight information in column O
- Randomize with flight checkbox checked ON
- Assign junior1, junior2, senior1, senior 2
- Assign athlete ID by clicking the button
- Generate Double panel rotation order
- Change to the final level BEFORE generate the score sheets. For example, Junior1 to Junior and Junior2 also as Junior so that they will be ranked together as one level.
